

1. List 5 common issues users face with USB keyboards or mice on laptops, and write one possible solution for each.

Answer ::

1. **Issue:** Keyboard or Mouse is not working.

Solution: Remove it and connect it again.

2. **Issue:** Some Keyboard keys are not working.

Solution: Clean the keyboard and check the USB cable.

3. **Issue:** Mouse cursor is not moving.

Solution: Clean the mouse and try another USB port.

4. **Issue:** Keyboard or Mouse keeps disconnecting.

Solution: Check the USB cable and connect it again.

5. **Issue:** Laptop does not detect the Keyboard or Mouse.

Solution: Restart the laptop and try again.

Q2. Simulate a troubleshooting flow: Your Bluetooth headphones are not connecting to your phone. Write the exact step-by-step actions you would take to diagnose and fix the issue, mentioning any settings or indicators you would check.

Answer ::

1. **Check Bluetooth:** Go to **Settings → Bluetooth** and turn it **ON**.
2. **Check Headphones:** Make sure the headphones are **ON** and have enough battery.
3. **Turn on Pairing Mode:** Press the Bluetooth/Power button until the light starts blinking.
4. **Check the Device:** See if the headphone name appears in the phone's Bluetooth list.
5. **Connect:** Tap the headphone name and select **Pair/Connect**.
6. **Try Again:** If it does not connect, choose **Forget Device** and pair it again.
7. **Restart:** Restart the phone and headphones, then try connecting again.

3. A user reports that their external webcam is not detected during a Zoom call on Windows 10. Write a checklist of 6 things to check or try to resolve the problem. Hint: Consider device manager, privacy settings, and app permissions.

Answer::

1. **Check USB:** Make sure the webcam is connected properly.
2. **Check Device Manager:** See if the webcam is showing there.
3. **Check Camera Permission:** Go to **Settings → Privacy → Camera** and turn it ON.
4. **Check Zoom:** Open Zoom settings and select the correct webcam.
5. **Check Driver:** Update the webcam driver.
6. **Restart PC:** Restart the computer and try the webcam again.

Q4. You are helping a friend whose printer is showing 'offline' status on their PC. Describe how you would use the Windows Troubleshooter tool to try to fix the issue, and explain what information the tool provides during the process.

Answer ::

1. **Open Settings:** Click **Start** → **Settings** or press **Win + I**.
2. **Open Troubleshoot:** Go to **System** → **Troubleshoot**.
3. **Open Other Troubleshooters:** Click **Other troubleshooters**.
4. **Run Printer Troubleshooter:** Find **Printer** and click **Run**.

What does the Troubleshooter check?

- **Printer Connection:** Checks if the printer is connected properly.
- **Print Spooler:** Checks if the printing service is working.
- **Driver:** Checks for printer driver problems.
- **Network:** Checks the Wi-Fi/network connection.
- **Printer Status:** Checks if the printer is ON and ready.

Final result ::

After checking, Windows shows **Problems Found** and gives a solution. It may fix the problem automatically or tell you what to do.

If no problem is found, check the **USB cable, Wi-Fi, printer power, and printer screen**.
